# Protect your Data
With Sophos MTR Flex

A Fully Managed Threat Hunting, Detection and Response Service with Flexible Monthly Billing

chess

What is Sophos MTR Flex?

Sophos Managed Threat Response (MTR) Flex provides 24/7 threat hunting, detection, and response capabilities delivered by an expert team as a fully-managed service on a monthly subscription basis.

Key Benefits of Sophos MTR Flex

Cybercriminals are employing ever evolving tactics and techniques. Staying up to date with the latest trends is almost impossible so maintaining security 24/7 requires vast resources and funding.

With almost half of UK businesses lacking the basic cybersecurity skills they need, a ransomware attack can cost your organisation more than £500k in downtime, lost orders, operational costs and more, according to a recent Sophos report.

Therefore, cybersecurity is no longer just part of your IT strategy, it is now a business priority for organisations of all sizes.

? Did You Know?

94% **of organisations**

experienced a business-impacting cyberattack or compromise within the past 12 months

Key Benefits of
Sophos MTR Flex

24/7 Proactive Security

MTR is not limited to just reacting to suspicious activity. It also involves proactive threat hunting and investigation of suspicious behaviours on the network. We handle containment and neutralisation actions and will inform you of the action(s) taken.

Full Device Visibility

One of the root causes of incidents in organisations is unprotected devices, which can then be exploited to identify further vulnerabilities within the network. Through MTR, you can identify all devices on the networks, including the ones that are unprotected, to take precautions.

Human and Artificial Intelligence

The best security approach is a combination of automated tools and human expertise. Machine learning helps to scan large quantities of data, but humans will identify the patterns that AI will have missed and recommend actions.
