

Work From Anywhere with

Modern Workplace Assessment and Experience

Work from anywhere, at any time safely with Windows Virtual Desktop that combines compatibility of Windows 10 with a new scalable multi-session experience for your end-users.

What is the difference between **Windows Virtual Desktop** and **Managed Desktop**?

Managed Desktop as a Service

is a managed service to support a physical device

Windows Virtual Desktop (WVD)

is a fully managed virtual desktop as a subscription service

What are the benefits of **Windows Virtual Desktop?**

Work on any device from anywhere

WVD is fully optimised to combine the power of Windows 10 and Microsoft 365 on any device you may have, including employee's own devices (BYOD).

Deploy in minutes

At Chess, we can deploy WVD in minutes helping you to work better together from anywhere, at any time.

Built-in intelligent security

Protect your data and ensure compliance with the built-in security features of Microsoft 365, even if using personal devices.

Reduce your costs

WVD helps to reduce costs by utilising your existing licences and prolonging the life of your hardware as you can spin WVD on old, under-powered devices since it uses minimal computing power.

What are the benefits of **Managed Desktop?**

Focus on your work

Using a managed desktop service allows you to focus on the core function of your business rather than supporting end-user devices.

Update your devices

As part of the Managed Desktop route, also known as Desktop-as-a-Service, you can choose to update your hardware and lease your end-user devices.

Reduce your costs

Reduce costs by outsourcing user device deployment, IT service management and operations, security monitoring and response and user support.

Built-in intelligent security

Protect your data and ensure compliance with the built-in security features of Microsoft 365, even if using personal devices.

Chess helps you decide which service is best for you

Modern Workplace Assessment

The modern workplace assessment will help you decide on the best solution for your organisation. Over two days a technical architect will review and advise on the right approach for your business - Managed Desktop as a Service or Windows Virtual Desktop.

Discovery

- Deployment of discovery tools and capacity planning
- Review of tenant readiness for Modern Workplace (Microsoft 365 licences, Azure AD configuration and devices)
- Capture of user scenarios (power users, frontline users, field sales etc.)
- Existing infrastructure including devices, network links, platforms
- Application discovery (Legacy, native, EoL etc.)

Review

- Create and share appraisal document
- Presentation walkthrough of discovery findings and tenant readiness
- Explaining the transformation steps and commercial implications
- A documented and defined desktop delivery strategy aligned to the business requirements

Price

£1,750 excl. VAT

Modern Workplace Experience

Through the Modern Workplace Experience, a technical architect will deliver over two days proof of concept, a dedicated virtual desktop and/or managed desktop environment.

- Proof of concept
- Dedicated virtual desktop and/or managed desktop environment for 5 users over 30 days
- Package and deployment of 3 selected line of business applications
- 2-hour knowledge transfer session to internal teams

Price

£1,970 excl. VAT
