Microsoft Power Platform - what is it and how can it help my business

Microsoft Power Platform allows you to adapt to a changing business environment quickly - analyse data, build solutions, automate processes. It bridges the gap between the data you already have and the solution you need to analyse and visualise the information.

Power BI

Make business analytics accessible at all levels of your company to enable data-driven decisions.

Power Apps

Improve business flexibility and help solve business challenges with low code tailored applications.

Power Automate

Drive efficiency by automating repetitive business processes allowing you to focus on generating business value.

Did You Know?

You can enhance Microsoft Teams by integrating it with the Power Platform to automate collaboration tasks, create productivity tools and promote data-driven decisions – all in a single platform.

Using the Power Platform in Chess

The Recruitment team at Chess struggled to keep track of vacancies requested by leaders throughout the business and potential candidates that may be suitable for these vacancies. They needed a quick, cost-effective solution that could be accessed and monitored by all team members.

By working together with the Development team they came up with the following projects:

- An application to add and amend current vacancies within the business
- An application to record and update candidate profiles
- Collaborative and shared content with communication features
- Ability to tie recruitment functions together within a single, secure workspace

With the ability to move away from spreadsheet-based recruitment, the recruitment team became more efficient and accurate. The applications allowed to free up time which is better spent engaging with potential candidates.

“Automating parts of the recruitment process at Chess using the Power Platform helped us save more than £57k just in the first year.”

ANNE BINNIE
PEOPLE SUPPORT DIRECTOR, CHESS

Analytics Delivery with Power BI

Our Analytics Delivery is a 7-day engagement during which our expert team will deliver up to three Power BI reports and an overall dashboard based on these reports. If you are unfamiliar with the possibilities of the Power Platform, it is the ideal service to help you get started and streamline your processes and reporting.

Day 1

Preparation and Planning

- Define business objective with key stakeholders
- Assess Data Quality
- Agree commitment
- Arrange site and system access

Day 2

Discovery

- Capture detail requirements
- Review existing documentation
- Review specific security requirements

Day 3-6

Building

- Deliver the Analytics as confirmed within the planning and discovery stages
- Engage with stakeholder to assess progress and refine the BI report (up to two iterations)

Day 7

Deployment

- Deploy the report into production environment
- Deliver training how to use the BI Report
- Schedule follow-up session

Application Delivery with Power Apps

Our Application Delivery is a 7-day engagement during which our expert team will deliver a Power App custom to your organisation and needs. If you are unfamiliar with Microsoft's Power Platform, it is the ideal service to help you get started and show you the customisation opportunities low code and no code development offer.

Day 1

Preparation and Planning

- Define business objective with key stakeholders
- Assess Data Quality
- Agree commitment
- Arrange site and system access

Day 2

Discovery

- Capture detail requirements
- Review existing documentation
- Review specific security requirements

Day 3-6

Building

- Deliver the Application as confirmed within the planning and discovery stages
- Engage with stakeholder to assess progress and refine the Power App (up to one iteration)

Day 7

Deployment

- Deploy the Power App into production environment
- Deliver training how to use the Power App
- Schedule follow-up session

Automation Delivery with Power Automate

Our Automation Delivery is a 7-day engagement during which our expert team will deliver an Automation allowing you to streamline repetitive digital tasks and boost productivity. If you are unfamiliar with Microsoft's Power Platform, this is the ideal way to start empowering your employees to focus on the real business opportunities.

Day 1

Preparation and Planning

- Define business objective with key stakeholders
- Assess Data Quality
- Agree commitment
- Arrange site and system access

Day 2

Discovery

- Capture detail requirements
- Review existing documentation
- Review specific security requirements

Day 3-6

Building

- Deliver the Automation as confirmed within the planning and discovery stages
- Engage with stakeholder to assess progress and refine the Automation (up to one iteration)

Day 7

Deployment

- Deploy the Automation into production environment
- Deliver training how to use the Automation
- Schedule follow-up session
